New free cohort course from Hugging Face

- Master the fundamentals: Understand how agents perceive, reason, and act in their environment.
- Use relevant frameworks: Build agents with LangChain, LlamaIndex, and smolagents.
- Explore real-world use cases: See how agents automate tasks, generate code, and more.
- Earn a certification: Prove your skills with a hands-on project and benchmark assessment.

Next Start Date: February 10th 2025
